

When the test comes, you want to know that your car will measure up to the requirements. Ford cars, with their light, strong, flexible frames, sturdy, powerful motors and simple design, meet all demands. In city or country, on good roads or bad, under all conditions, the Ford gets there—and gets back—at an average cost of two cents a mile for operation and maintenance.

Buyers will share in profits if we sell at retail 300,000 new Ford cars between August 1914 and August 1915.

Runabout \$440; Touring Car \$490; Town Car \$690; Coupelet \$750; Sedan \$975, f. o. b. Detroit with all equipment.

MAIL BOXES; PUT 'EM UP

Eighteen hundred old established residences in Phoenix are not supplied with front porch mail receptacles, according to figures given out by Postmaster C. B. Wood yesterday. A form letter campaign is being conducted to induce these residences to equip themselves according to the department's desires.

"The response in newly opened districts is good," said the postmaster. "By recent additions to the carrier force, we are now able to give service to some places that had none before, and to give twice a day service in some sections where once a day was in force before. Most of the new districts have come through willingly and promptly."

In the form letter mailed to people in some of the old double service districts who have not complied with the regulation, it says:

There is no special or particular kind of receptacle required or specified. In some parts of the city residents have provided themselves with jardiniere on flower stands, woven olives, clay ollies, Indian baskets of various designs, and other sorts of receptacles that pleased their fancy. You see, therefore, that you are given a wide latitude in the selection of a receptacle.

It is the desire of this office to provide the best service possible to the people of Phoenix. This service must be efficient and economical, and in order that it may be we must have the co-operation of the patrons of the office. The only way it will be possible for us to give additional service is to satisfy the department that the present service is efficient and economical.

IT WAS FATHER'S NIGHT IN OSBORN DISTRICT

Dedication of the New School Auditorium

The new auditorium of the Osborn school was thrown open for the first time to the people of the district, Friday night, with an entertainment given by the Parent-Teachers Association and uniquely termed "Father's Night." This is a regular feature of the work of the association, to bring the fathers into closer touch with the educational advancement of the district, and to enable them to meet old friends and make the acquaintance of new residents.

The officers of the association, of which Mrs. Parker Woodman is president and Mrs. Susie McQuesten, secretary, together with the various committees, have labored assiduously to provide a series of entertainments that would prove not only entertaining but instructive as well, and it is worthy of note that their efforts have been crowned with success. The following was the program:

Vocal solo—"On the Shores of Italy," Miss Anna Luke, Miss Ward, accompanist.

Recitation—"A dark Brown Diplomat," Miss Anna Y. Moore.

Recitation—"A Shaker Romance," Miss Vivian Young.

Vocal Solo—"Absent," Mrs. W. B. Anderson, Miss Percival, accompanist.

Instrumental Solo—"Valse 1," Chopin; Miss Carmelita Ward.

Dr. Sims, president of the Arizona Senate, concluded the program with an instructive talk to the pupils and parents on the care and preservation of the teeth and the important functions they perform in the health and life of the people.

At the close of the program, dainty refreshments provided by the ladies of the district, were enjoyed by the large number present.

AN ENTERTAINMENT FOR ODD FELLOWS

Play and Banquet Next Wednesday Night

Odd Fellows in the city next week, will be concerned in some slight changes from the previously announced program for the entertainment of the membership during the session of the jurisdictional grand bodies. The banquet hour on Wednesday night has been changed from 8 to 9 o'clock. All holding tickets are expected to meet at the Ford hotel at 8:30 o'clock and go from there to the banquet hall. Only members of some branch of the order in this jurisdiction are eligible and tickets must be secured between Tuesday morning and Wednesday noon at Odd Fellows Hall.

The committee has arranged for a special performance at "The Bishop's Carriage," by the Redmond company at the Columbia theater on Monday night. Specially invited guests will include all members of any lodge or any branch of the order in the jurisdiction of Arizona and they may secure tickets without charge at Odd Fellows Hall, up to 5 P. M. Monday. Members of this or any other jurisdiction, may purchase additional tickets for themselves or friends, until the section reserved is exhausted. The theater box office will of course be open as usual to the patronage of the general public.

Hayden Happenings

Many new people are coming into town every day. Copper is soaring in price and Hayden will furnish a great quantity for the market. Many of the old employees are returning also.

Mr. and Mrs. Williams who left a year ago have not found so good a place as Arizona anywhere in the East, and have returned from Knoxville, Tenn., to make their home permanent in this state.

Mr. and Mrs. Roy Hatch left on Tuesday for Kansas where they will visit for a short time before going on their long trip to Juneau, Alaska, where Mr. Hatch has a position.

Mr. George Mount is moving to his ranch on the San Pedro.

The Odd Fellows who are preparing for a banquet at their hall on the twenty-fourth of this month, need a dance at Hutton Hall, Winkelman on May 8th, report a full attendance at their regular meetings. Many old members have returned recently.

Mrs. Hill went to Phoenix, on Thursday to meet Mrs. Tucker on her return from Nebraska after several months visiting with her parents.

Mr. Tucker is finishing a new house which the wife and new daughter will occupy in a few days.

A host of friends will welcome Mrs. Tucker back to Hayden.

Frank L. Jr., and John Knapp who came from Clifton to attend their mother's funeral returned to their duties on Friday.

Mrs. Dora Lincoln and children are back after several months in the southern part of the state. Mrs. Frank Knapp, nee, McNulty, who died on Sunday after a few hours' illness, was the wife of Frank Knapp, bricklayer's foreman for the A. S. & R. Co. Mrs. Knapp was born in Bellina county, Mayo, Ireland, and came to America when still a young girl. She was married to Mr. Knapp in Philadelphia in 1884. They have lived in Hayden since the town was built. Their two sons, Frank Jr., and John, who live in Clifton, are inseparable at not being able to reach the mother's bedside before she passed away. They made record time in an auto over dangerous roads between Clifton and Hayden, but failed to arrive in time to answer the mother who called for them.

A large throng of friends followed the remains to the cemetery at Hayden where the liturgy of the Catholic Church for the dead was solemnly recited and the dear one laid to rest under banks of flowers, the offerings of friends and relatives. Besides a husband and two sons; two daughters, Mrs. Travis Armand and Miss Katie Knapp are left to mourn the loss of a devoted mother. The departed spent her life in a service of love to her family and friends and her children will take up the work she left and showed them how to do. The flag over the smelter was lowered at half mast during the time of the funeral.

CARD OF THANKS

The husband and children of the late Mrs. Frank Knapp wish to thank their neighbors and friends for their many acts of kindness and sympathy shown the sorrowing family in their recent bereavement. (Adv.) R

FRANKLIN MAKER IS A REAL ENTHUSIAST

It is said that H. H. Franklin makes more practical and extensive personal use of the automobile than anyone in this country. With him the automobile not only displaces the horse and street car, but railroad trains as well. On all business trips in the East and as far West as Chicago, Mr. Franklin drives his car. His most frequent trips are to New York and Boston. The distance from Syracuse to New York is 300 miles; to Boston 350 miles. These trips are made in one day in the winter as well as in the more favorable touring seasons.

As a rule Mr. Franklin does his own driving and uses a sedan throughout the entire year.

"Hard, steady driving on long trips is the best test of a motor-car," Mr. Franklin says. "I test out in this way every model we build, and have done so for years. Our engineers feel that I am harder on an automobile than the public and that if a car meets my requirements it is a good car to sell. The long drives I make are not tests of physical endurance, because we require that the Franklin car shall not

Economy that is Economical

Those of us who discriminate in clothing values judge a suit not by how long the trouser seat holds out, but by the measure of real service.

Stein-Bloch Smart Clothes

by virtue of the shapely way they almost everlastingly hang together, have won the right to be in a value class by themselves. And, some of you may be surprised at this—you can get a Stein-Bloch for as little as \$20.00.

If you ask for a more definite wear assurance, we point to our label and theirs—a two-name guarantee of unqualified satisfaction.

Come in and stand before our mirrors in one of the new Stein-Bloch Spring models. You'll want to wear it home.

be hard on the driver or occupants. But the trips do test the car. I usually drive each model 5,000 to 10,000 miles. Careful record is kept of all adjustments, gasoline and oil consumption, tire mileage, etc., for checking up with the Franklin standard."

The Mines of Arizona

(Continued from Page Three)

locations. One person may locate a claim of twenty acres, or eight persons a claim of 160 acres. The law as to the amount of labor that must be performed to protect the claim, is the same in the case of all locations as for other mineral claims, except that in the case of a claim of 160 acres only one assessment needs to be done.

"The patenting of oil land would involve the making of proof that \$500 worth of work had been done on the

claim and the payment of \$5 per rods, scrap and old, 23,363,362 pounds, acre for the ground patented. It valued at \$3,322,687.

It would also be necessary to show the discovery of oil.

"I assume that the land you wish to locate is in the national forest. This will not prevent location, but it will necessitate compliance with the rules and regulations of the forest service."

Copper Exports \$3,322,687

WASHINGTON—Imports and exports of copper at the customs districts of New York, Massachusetts, Philadelphia, Maryland, Virginia, Galveston, New Orleans, San Francisco, Washington and Michigan during the week ended March 27, according to the department of commerce were as follows:

Imports, ore, matte and regulus, 272,632 pounds, valued at \$33,237; pigs, ingots, bars, plates and old, 2,825,229 pounds, valued at \$327,280.
